# RELEASES

## 2024: From Origin To Decay

LP | F.D.A. Records

Featuring nine even more powerful, technical and atmospheric tracks, the latest album reflects on the cycle of creation, decay, and renewal.

Its lyrics draw on ancient Egyptian and Near Eastern imagery to explore philosophical questions of existence, transformation, and impermanence.

## 2017: Monuments Will Enslave

LP | Aural Attack Productions

This album explores the suppression of the individual will in the service of higher powers and questions the purpose and existence of legacies.

With a harsher, more aggressive sound than its predecessor, the sound mirrors the violence of its themes and the fractures within an age-old exploitative system.

## 2014: As We Create The Hope From Above

LP | Aural Attack Productions

The first full-length album blends brutal, technical death metal with atmospheric elements.

While the debut EP focused mostly on mythological themes, several tracks here shift toward more worldly subjects, adding depth and contrast to the band's lyrical concept.

## 2011: Born In Sand

EP | self-released

The debut EP introduced Maat with raw, technical death metal steeped in Egyptian mythology. The band combined crushing riffs with lyrical imagery rooted firmly in ancient gods, rituals and desert landscapes.

The four-track EP set the scene for the atmospheric and conceptual depth that would come to define the subsequent albums.
