Band Bio (Long Version):

Stillborn Soiled is a Death/Sludge metal trio forged in 2023 through a cross-continental collision between Syria and Nuremberg. The band channels raw chaos into sound, blending punishing death metal brutality with the slow, crushing weight of sludge.

Fronted by Syrian vocalist Mado Asfour, with German members Tobias Utz on guitar and Nick Marschel on drums, Stillborn Soiled erupts with a sound that is heavy, dark, and unrelenting. Their music doesn't just hit it scars, dragging listeners through a murky void of distortion and guttural fury.

On stage, their presence is as explosive as their recordings: energetic, powerful, brain-killing. Each performance is a descent into shadow a ritual of noise and emotion meant to obliterate the border between rage and catharsis.

Their debut full-length album, *Cerebral Carnage*, drops on July 12, 2025, promising a sonic assault that captures the very essence of everything depraved.
